

Pitt Pollinator Gardens Through the Years

2013

SRCC Pollinator Garden Beds

Located along the pathway to SRCC east entrance by the benches.

First developed in 2013 by students.

Has featured native species including cone flower and golden rod.

2020

Posvar Pollinator Garden on Clemente

Located on one of the Posvar Hall patios.

Designed by students in the spring of 2020 and planted in June of 2021.

Has featured native species such as white bergamot and butterfly milkweed.

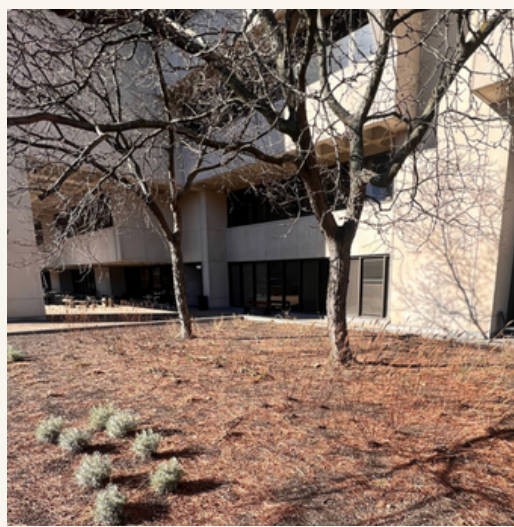

Bee Campus USA

In June of 2020, Pitt became a certified Bee Campus USA.

2021

Relearn our Land Garden

Located on one of the Posvar Hall patios.

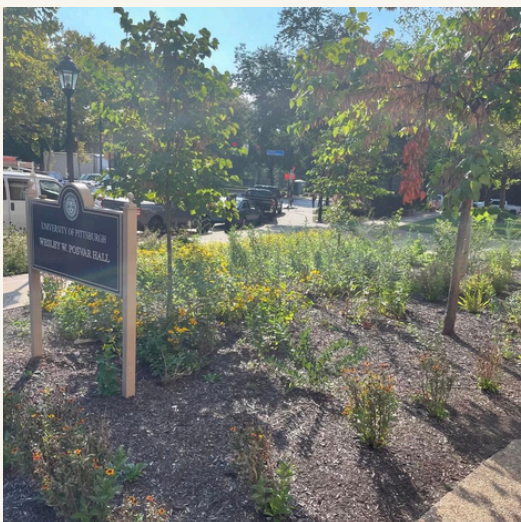

Student-designed in Fall 2021 & planted in Spring 2022.

Features species with significance to Indigenous peoples.

2022

2023

Posvar Pollinator Garden on Schenley

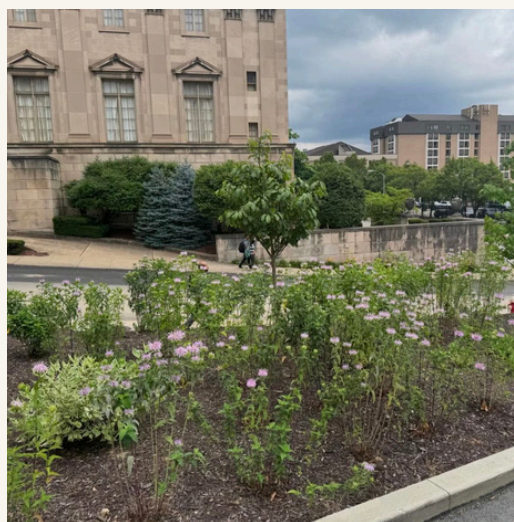

Located near Schenley Drive and Clemente Drive on the side of Posvar Hall.

Re-planted by students in fall of 2023.

Has featured native species such as purple coneflower and lupin.

Marlie Garden

Located at the corner of Parkman Avenue and O'Hara Street near the SRCC building and Chevron Science Center.

Planted by students in the spring of 2023.

Has featured species such as stiff Goldenrod and wild Indigo.

Pitt Sustainability Plan

Pitt Sustainability Plan goal to replace 15% of lawn area with indigenous and adapted plant species by 2030, benefitting pollinator species.

2030
